

PermaTurf

Synthetic Grass that's Up to 20% Cooler

It's what's on the surface that counts.

Description

While PermaTurf looks like real grass, it never needs mowing or watering. It also has the benefit of being super hard-wearing while being constructed of soft low-abrasive fibres. Moreover, and significantly for sunny locations, it provides up to 20% cooler surface temperatures than similar artificial turf products. Dependably lush and conveniently free-draining, this is the turf that sets the standard in landscaping turf.

-  Texturised monofilament for realistic natural look and feel
-  HeatBlock cooling technology for up to 20% reduction in temperature
-  Permeable surface allows water to drain through
-  Non-allergenic and safe for children and pets
-  Can be cut to length
-  Can come with a shock absorbing underlay

Specifications

Product type	Synthetic turf
Dimensions for PermaTurf	Height: 30mm Width: 184cm, 368cm Length: 30m roll
Certification	NZS 5828:2015
