

PlayPod

Permanent scuff zone solution under play equipment

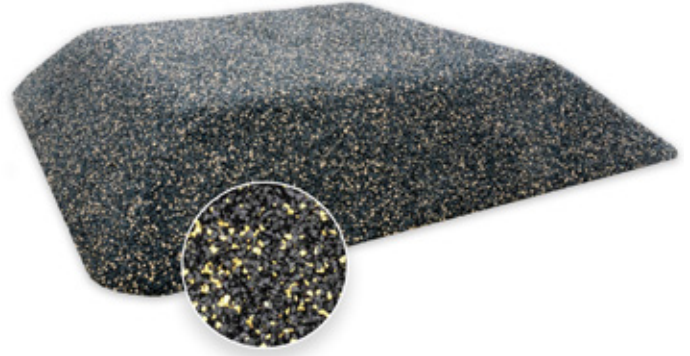

It's what's on the surface that counts.

Description

Our PlayPods were designed and developed as a permanent solution to the problem of bark scuffing out under play equipment. Installed under play equipment, they provide a long-term safety surface and all-weather scuff zone.

-  A porous free draining product
-  Easy application
-  Anti slip surface
-  Protects against UV and weather extremes
-  Colour options are available

Specifications

Product type	Rubber granules
Dimensions	Width: 90cm Length: 90cm Thickness: 17.5cm
Critical fall height (CFH)	Provides a 2.5 metre CFH
Surface	Granule texture
Certification	NZS 5828:2015

Components

80% recycled rubber, 20% TPV rubber

Recommended Use

Install under swings, slides and other high traffic playground areas to stop loose-fill material movement and provide a permanent safety surface.

Product Installation

DIY installation with full instructions and 4 x galv anchoring pins included.

Care & Disposal

Continuous bark installation is required to keep pods level with the ground. Can be recycled into base layer for sports fields and playgrounds at end of life.

Warranty

3-year warranty.
