

Steppers

Create a challenging playground that develops both bodies and minds

Description

Steppers can be used to create seating, balance play and edging around your playspace while also developing imaginative and open-ended play.

Steppers as seats can be walked along, stepped over, or to lead the child into a new space to explore. Balance play is great for physical development as simple movements eventually lead to more challenging exercises, tricks and the development of problem-solving skills.

A porous free draining product

Customisable size options

Protects against UV and weather extremes

Can be any mix of colours

Specifications

Product type	Rubber granulate
Particle size	5mm
